

Pizza, Please

Help Frankie match the pizza orders with the pizzas.
Draw a line from the order to the correct pizza.

Frankie Says:

Doing jigsaw puzzles is a fun way to sharpen your child's visual discrimination skills. To make your own puzzle, cut out an interesting picture from a magazine or use the cover of a greeting card. Glue the picture onto a sheet of tagboard or heavy paper. Next, cut the picture into eight or more pieces. Then have your child arrange the pieces to form the picture. Later, store the puzzle pieces in an envelope or resealable plastic bag.
